

## Teaching Feedback for DBA5104

	Score
The Teaching Assistant has helped improve my understanding of the course topics through his assignment evaluations and consultations	4.6/5
The Teaching Assistant has helped improve my understanding of the course topics through his tutorials (e.g., on igraph and ERGMs) and guest lectures (e.g., on network effects in policy evaluation)	4.5/5
Overall, the Teaching Assistant provided timely and useful feedback	4.9/5

### Comments

The TA always answered our questions and was always willing to help. His tutorials and sample codes were helpful as well in understanding graph and ERGM.

Eugene has been an amazing TA overall. His very detailed comments in all assignments, presentations, and projects have been extremely helpful. He is also very timely when providing his feedback (very hardworking!). He is also very well versed with this course and is able to really advise students in their questions.

Ability to give explanation about our problem to find the right use-cases

Thank you for being so matter of fact and helpful! :) appreciate you & this course in general. learnt lots

Hope can have codes of network science use case, maybe from previous students assignment that has good mark

Eugene has very well thought out answers, and knows how to poke holes in our project ideas so we can improve. But hope that Eugene can provide more hints/answers too, sometimes we are too inexperienced to know how to tackle the critique and solve it

Eugene is very helpful and we can see that his extensive and detailed comments in the assignments were written with the student in mind. Very much appreciate him being part of the A-team (teaching team)!
